

Mini Power Plant Portable Fume Extractor

Ideal for Contractors, Maintenance and Repair Operations, or Light Manufacturing Applications.

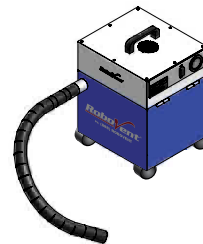

The RoboVent Mini Power Plant provides convenient, portable fume extraction in a compact yet powerful package that can easily go with you wherever you need it. The Mini plugs into a standard 110 volt outlet, and comes with a 15 ft. long 2" diameter hose and source capture hood. Other hood combinations are available, and the unit can also be used to provide suction for a RoboVent FlexPro FumeGun. Smoke and fumes are filtered out of the air.
